Press Release

September 5, 2008

DANVILLE, CA (September 5, 2008) GolfTraxx (<http://golftraxx.com>) has just announced support for the Apple iPhone™ 3G and is offering FREE downloads from the Apple iTunes™ website. This first iPhone™ version is fully functional offering support for landmarks as well as distances to front, center, and back of each green.

“We are absolutely delighted with the addition of the Apple iPhone™ platform to our PDA line-up.” said Frank DeBenedetti, founder of GolfTraxx. “We took the very best features from our other versions and utilized the outstanding graphics of the iPhone™ to create an easy to use interface for iPhone™ which golfers are able to use on their first trip to the course.”

The GolfTraxx iPhone™ edition is fully integrated with the GolfTraxx database which contains hole-by-hole information for over 21,500 courses in across the globe, which can be downloaded to PDA devices via GPRS or WIFI access as part of its voice-enabled, 100% open standards Golf GPS solution for Blackberry™, Garmin Ique™, TREO™, Palm One™, Palm LifeDrive™, Windows Mobile™, Pocket PC™, and Windows Mobile 5™ with built-in Voice Response. Over 2,000 of these courses already have GPS coordinates as well.

Using Google Earth™ and following the GolfTraxx mapping guide (<http://pdazip.com/MappingCourses.pdf>), golfers can quickly and easily map other favorite courses, not yet mapped by GolfTraxx customers, then submit the Google Earth .kml file to GolfTraxx for addition into the GolfTraxx on-line database within a few days. The first ten thousand Google Earth course submissions in the next 90 days (not already submitted) will receive FREE lifetime course download privileges from GolfTraxx.

Once the coordinates have been added to the GolfTraxx database, GolfTraxx users can then download the course directly to their device and receive yardages to reach (and to carry) each of the targets mapped for a particular hole in a **single click**. GolfTraxx' competitors use difficult to understand abbreviations for these additional targets and force their customers to scroll through a list of these waypoints one-by-one to find the appropriate waypoint for a particular hole.

“Google Earth provides an efficient mechanism for our customers to submit and/or update golf course maps at any time. It also enables us to rapidly respond to customer requests and visually verify coordinates” added DeBenedetti. “Our customers can already select from thousands of mapped

courses, and/or quickly and easily create capture targets on other courses they play using the device itself, and/or submit Google Earth™ maps of their local courses to us for addition to the GolfTraxx on-line database. We then make these hole-by-hole GPS coordinates available for FREE download... usually on the same day the course is submitted, while our competitors charge a recurring annual fee for the data, or charge separately per course. Our belief is that GPS coordinate data should be available for FREE, but most of our competitors do not even supply the actual coordinates, even after you have paid for the courses. Google Earth™ data is also **far more accurate** than our competitors' data since it does not rely on manually collected GPS points. As a result, our customers now enjoy **far greater accuracy** and **lower cost-of-ownership**, through FREE access to hole-by-hole scorecard data and FREE GPS coordinate data for direct download to their PDA."

GolfTraxx offers **FREE downloads** of the software for Palm One™, TREO 650™, TREO 700P™, TREO 700W™, Palm LifeDrive™, Windows Mobile™, Garmin Ique™, and Pocket PC on their website. GolfTraxx offers **FREE downloads** of over 21,500 course scorecards in their on-line database directly to PDA devices. GPS coordinates are already available in several hundred of these courses for **FREE** to all GolfTraxx users. GolfTraxx' competitors require their customers to **purchase courses separately**. GolfTraxx offers various bundled solutions between \$79.00-\$599.95. If you already have a bluetooth GPS receiver, or all-in-one Windows Mobile device GolfTraxx can be purchased stand-alone for \$29.00. Registered users receive a special link that enables them to determine which courses have already been mapped across the globe.
